

Instructions

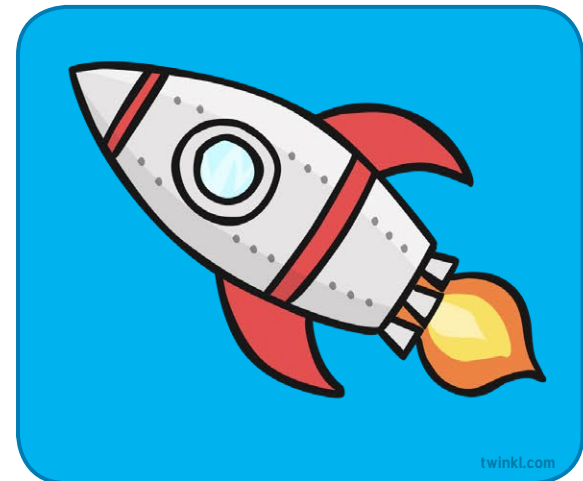

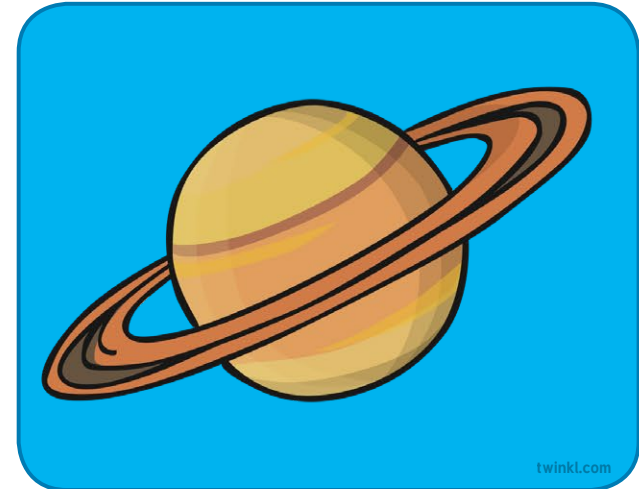

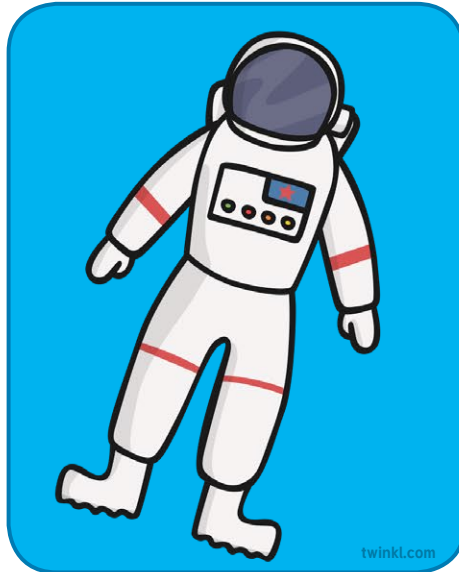

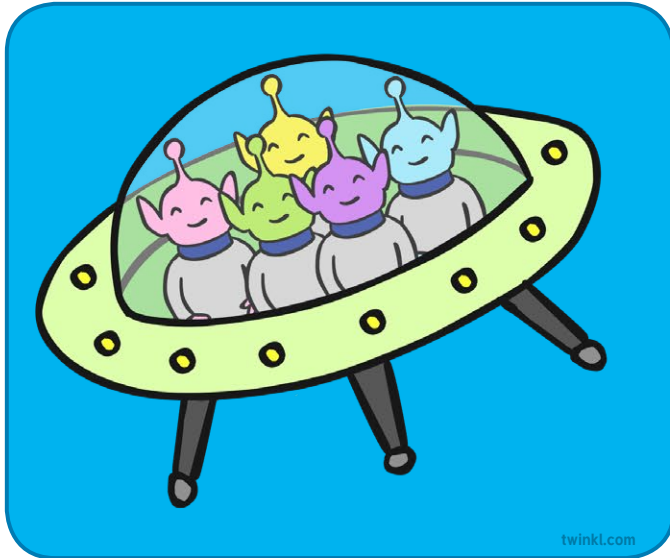

- This game is for two players.
- Cut out the separate pictures. Each player gets one of each of the pictures.
- Cut out the word cards and laminate the corresponding verbs back to back.
- Put the laminated cards into separate piles according to the picture on it (ie cards with rockets in one pile, and cards with planets in another) with the picture facing up.
- Roll the dice. Take a card from the pile the dice lands on (ie if the dice lands on Earth, take a laminated card from the earth pile). DO NOT look at the other side.
- Write down what you think the past verb is on your answer sheet. Turn the card over. If the answer is correct take the image off the card from your pile and place on your mat. If the answer is wrong pass the dice back to the other player without picking up a picture
- If the dice lands on a picture you already have, then the dice passes to the other player.
- The first to complete the space scene is the winner.
