Today we are learning about composition of 5. If your child can, extend them to a number up to 10.

## #MathsEveryoneCan

Gather together a collection of up to 5 objects.  
Hide some of them in a bag or box, leaving the rest of your objects on the floor where you can see them.

How many objects can you see?  
How many of your objects must be hidden in the bag?

## #MathsEveryoneCan

Collect a set of objects and count how many you have altogether.  
Give a friend some of the objects and hide the rest in a bucket or box.  
Can your friend work out how many objects you have hidden?

Change the number of objects and the number hidden each time.  
Then take it in turns to work out how many are hidden.

Remember these internet safety rules:

Always ask a grown-up for help if you see anything strange or unusual.

Don't download or install anything without asking a grown-up first.

Remember, not all games and videos are for children.

Don't talk to strangers online and don't tell them where you live.

If you are ever unsure what to do, remember Buddy's song, and always ask for help!

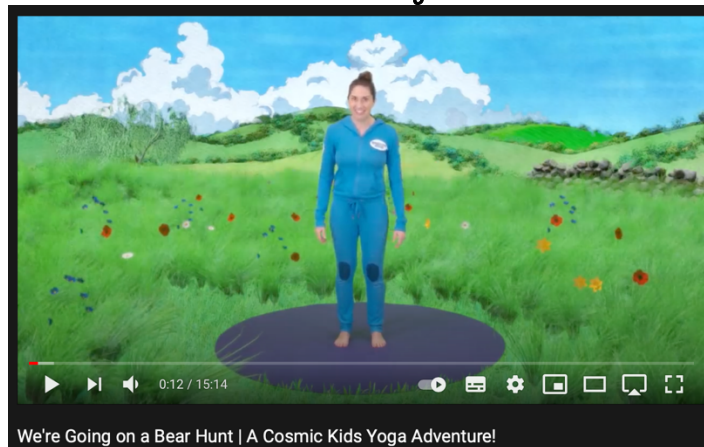

Don't forget to send me a picture of your bar chart!
